### ACTIVITY REPORT 18.11.2022

#### Interactive Session on 'Spoken English Proficiency' in Association with the English Language Academy

Yashoda Technical Campus, Faculty of MBA, MCA & B. Pharmacy organized an Interactive session on 'Spoken English Proficiency' to test the student's capabilities and boosting their level of spoken English.

Students of Professional courses need to improve the spoken English in order to match the global standards. Language is our primary source of communication. It's the method through which we share our ideas and thoughts with others. Some people even say that language is what separates us from animals and makes us human.

There are thousands of languages in this world. Countries have their own national languages in addition to a variety of local languages spoken and understood by their people in different regions. Some languages are spoken by millions of people, others by only a few thousand.

English may not be the most spoken language in the world, but it is the official language of 53 countries and spoken by around 400 million people across the globe. Being able to speak English is not just about being able to communicate with native English speakers; it is the most common second language in the world. If you want to speak to someone from another country then the chances are that you will both be speaking English to do this.

Recognizing the importance of English in today's world, Yashoda institute has taken initiative to know the areas of improvement in students with respect to this subject.

Hon. Mrs. Swati More discussed about following topics very effectively. Investment Opportunities in developing country like INDIA, she explained meaning of Investment opportunity as, Investment opportunity means "anything, tangible or intangible, that is offered, offered for sale, sold, or traded based wholly or in part on representations, either express or implied, about past, present, or future income, profit, or appreciation." She explained ten important Investment opportunities as follows.

Some of the above investments are fixed-income while others are market-linked. Both fixed-income and market-linked investments have a role to play in the process of wealth creation. While market-linked investments help in navigating the volatility and in the process generate high real return, the fixed income investments help in preserving the accumulated wealth so as to meet the desired goal. For long-term goals, it is important to make the best use of both worlds. Have a judicious mix investment keeping risk, taxation and time horizon in mind.

**Report on YOGA for Students**

**June 21, 2022:** International Yoga Day was celebrated with full spirit and joy in the Faculty of MBA. In the morning, there was a 1hr Mass Yoga session for the teacher of Yashoda Technical Campus. A formal programme was conducted during college working hours. Director was the chief Guest of the event. The International Yoga Day was organized at Faculty of MBA with the theme named "Yog for Students" A sum of 40 students comprising both Boys and Girl students of Faculty of MBA demonstrated Surya Namaskar, Various asanas of Yoga showing the strength of Yoga and the flexibility attained on doing it. Man is a physical, mental and spiritual being; yoga helps promote a balanced development of all the three. Other forms of physical exercises, like aerobics, assure only physical well-being. They have little to do with the development of the spiritual or astral body.

The art of practicing yoga helps in controlling a Students mind, body and soul. It brings together physical and mental disciplines to achieve a peaceful body and mind; it helps manage stress and anxiety and keeps you relaxing. It also helps in increasing flexibility, muscle strength and body tone. It improves respiration, energy and vitality. Practicing yoga might seem like just stretching, but it can do much more for student's body from the way it feels, look and move. Dr. R. R. Chavan conducted the activity and inspired students to do yoga as a regular practice.

and Live Trading Session The students of MBA are the future budding managers; they have to run the business efficiently. In order to obtain detailed knowledge about upcoming 21St century challenges and also to face the challenges regarding investment opportunities the interactive session of Hon. Shankar Karpe founder president of Girisha Wealth Maker Pvt. Ltd. was organized. He explained in details about various investment opportunities and how to grow financially through investment in the financial sector. How stock exchanges work, what are the indexes of various stock exchanges and other important functions of it. He also discussed about following topics very effectively. Investment Opportunities in developing country like India, He explained meaning of Investment opportunity as, Investment opportunity means “anything, tangible or intangible, that is offered, offered for sale, sold, or traded based wholly or in part on representations, either express or implied, about past, present, or future income, profit, or appreciation.” He explained ten important Investment opportunities as follows. Some of the above investments are fixed-income while others are market-linked. Both fixed-income and market linked investments have a role to plan in the process of wealth creation. While market-linked investments help in navigating the volatility and in the process generate high real return, the fixed income investments help in preserving the accumulated wealth so as to meet the desired goal. For long-term goals, it is important to make the best use of both worlds. Have a judicious mix investment keeping risk, taxation and time horizon in mind.
